

**Course Series: Management**  
**Course Number: M-208**  
**Course Title: System Configuration & Parameters**

**Prerequisites:**

Successful completion of the following:  
M-100

**Length: 8 Hours**

**Course Objectives:**

This course along with course M-207, M-206, contain educational instructions which expose the student to resources which could affect the integrity of inventory and personnel information within the IRMS warehouse environment.

Students attending this course will learn the important steps it will take to set-up system parameter records that will allow IRMS to work at a level of accuracy unattainable without a warehouse management system.

**Topics Covered:**

- **Setting up and Maintaining System Parameters, including:**
- **Inventory Control Parameters**
- **Receiving Parameters**
- **Order Manager Parameters**
- **Picking Parameters**
- **Packing Parameters**
- **Replenishment Parameters**
- **Returns Parameters**
- **Shipping Parameters**

**Associated Courses:**

Attending Functional area courses along with Warehouse series courses will enforce the needs for accurate System Parameter set-up and Management.

**Costs:**

Per Student:	\$200
Block (1-6) students:	\$600
Additional Students:	\$100
